Your search retrieved zero articles.

To re-phrase your existing search criteria, press the "Back" button on your browser; or you can [enter a new search](#). Here are some suggestions:

► Try this search in [other journals](#)
► Alert me when:
[New articles matching this search are published](#)
► [Download Displayed Citations](#)
[to Citation Manager](#)

- Check your spelling.
- If you searched for an author name using initials, try again using only the author's last name
- Truncate words using the asterisk (*) to find word variations: embryo* retrieves embryo, embryos, embryonic.
- Pay particular attention to terms containing hyphens, periods, or other punctuation. Punctuation is ignored and letters or numbers separated by punctuation are treated as separate words: Search IL-4 with il-4 or il 4 (with a space), but not with il4 (without a space). Search mRNA with mrna, not with m-rna or m rna.
- Avoid Greek letters, superscripts, subscripts, and other special characters.
- To search for an author name containing special characters, use the wildcard * to truncate the author name before the special character. For example, to search for articles by Stefan Grundström, you should search for Grundstr*
- If you used parentheses, make sure that they are matched.
- For additional information, read [Help with Searching](#).

Plants exhibiting enhanced nitrogen assimilation - e.g.
glutamine-synthetase, asparagine-synthetase and *asparaginase*
over-expression in *transgenic* *plant*, for application in enhanced
nitrogen-fixation and improved yield
 AUTHOR: Coruzzi G M; Brears T
 PATENT ASSIGNEE: Univ.New-York 1995
 PATENT NUMBER: WO 9509911 PATENT DATE: 950413 WPI ACCESSION NO.:
 95-155252 (9520)
 PRIORITY APPLIC. NO.: US 132334 APPLIC. DATE: 931006 *Too LATE.*
 NATIONAL APPLIC. NO.: WO 94US11281 APPLIC. DATE: 941006
 LANGUAGE: English

- e.g. glutamine-synthetase, asparagine-synthetase and *asparaginase*
over-expression in *transgenic* *plant*, for application in enhanced
nitrogen-fixation and improved yield
 ABSTRACT: The following are claimed: (1) construction of a *transgenic*
 plant (I) with an improved agronomic or nutritional characteristic by
 engineering (I) for ectopic overexpression of 1 or several nitrogen
 assimilation/metabolism enzymes; (2) transforming (I...
 ...more than 1 gene fusions that confer ectopic overexpression of more than
 1 of the nitrogen assimilation/metabolism enzymes; (3) selecting or
 identifying the transformed *plant* based on the trait conferred by a
 marker gene linked to the gene fusion; (4) screening and selecting the
 transformed *plant* for improved agronomic or nutritional
 characteristics when the transformed *plant* is cultivated under
 nitrogen non-limiting growth conditions; (5) a seed of (I) which

contains more than 1 of the gene fusions as in (1); (6) a method of producing a *plant* with a suppressed level of glutamine-synthetase (GS, EC-6.3.1.2) and asparagine-synthetase (AS, EC-6.3.1.1); and (7) a *transgenic* *plant* which ectopically overexpresses a gene encoding aspartate-aminotransferase (EC-2.6.1.1), glutamate-2-oxoglutamate-amino transferase, glutamate-dehydrogenase (EC-1.4.1.2), *asparaginase* (EC-3.5.1.1), eukaryote AS or cystolic GS. (105pp)

DESCRIPTORS: glutamine-synthetase, asparagine-synthetase, aspartate-aminotransferase, glutamate-2-oxoglutamate-aminotransferase, glutamate-dehydrogenase, *asparaginase* over-expression in *transgenic* *plant*, appl. enhanced nitrogen-fixation, improved yield enzyme
EC-6.3.1.2 EC-6.3.1.1 EC-2.6.1.1 EC-1.4...
